

Ignite Coordinator Checklist and Implementation Plan – Middle

Each step listed provides Ignite Coordinators the opportunity to maximize their implementation at their schools. Each school will be different, so this progress may not look the same for other schools at the same time. By maintaining this checklist/plan, you can evaluate your progress as you go through the school year, and we have a working document to discuss should you need assistance. **Please keep in mind that communication is key to successful implementation of the program. Please respond to emails/calls about implementation so that we can help.**

Remember the steps to complete in MajorClarity: Pathway Selection, Assessment Completed and then start exploring with Portfolio Task Completion. If you have eager students who want to work independently, please encourage it! At this point, you can run a School Usage Stat report to see the enrolled students and current year activations. To get your percentage of student activations so far, simply take the activations and divide it by the enrolled students. You can also run a Student Overview Report to view student progress in the platform.

Implementation Plan Progress

At each of the MajorClarity Checks listed, document your findings so you can see the progress you are making with your students. Compare what you did to what you planned to do. Are there any areas that you could improve? Do you need help with an area? Additional training? These are the things I will touch base with you about and help you with addressing, in addition to checklist items. The return rate is provided by MajorClarity to me monthly when we have our monthly meetings. I can share that information with you if interested. Just send me an email to request it.
